# Introduction

## Company overview

Harnessflex was established in 1984 and is a leading designer and manufacturer of flexible conduit systems and connector interfaces, protecting critical electrical and electronic wiring assemblies in the automotive industry.

—  
01 **TPS T-piece** - External conduit fitting with Multi-way reducer.

### Applications

Harnessflex provides harness solutions for:

- Agricultural vehicles
- Construction vehicles
- Engine manufacturers
- Harness manufacturers
- Truck & bus manufacturers
- Tanker & trailer manufacturers
- Specialist vehicle components
- Military vehicles

Harnessflex offers complete system solutions for the routing and protection of electrical wiring against damage by mechanical abrasion, liquid ingress and corrosion salts. Using a Harnessflex conduit system ensures that vulnerable connectors are not exposed to the elements, impact of foreign bodies or jet washing, all of which can cause vehicle malfunction and failure.

Our success has come from our systematic commitment to providing an extensive range of high-grade quality components. Combining a full range of slit and un-slit conduit, fittings and connectors, we also offer a large range of hinged system components and connector interfaces.

### Our customers

Offering bespoke design that utilises our extensive range of interfaces, we can offer tailored and innovative solutions for a range of applications.

### Quality approvals and standards

Manufacturing is controlled in accordance with BS EN ISO 9001, whilst ongoing testing is conducted to the highest international standards and approvals. This provides the confidence that Harnessflex products can be used across the widest variety of automotive applications, including those in the harshest and most aggressive environments.

All components comply with End of Life Vehicle (ELV) directive EU2000/53/EC. Harnessflex also comply to ISO14001 - Environmental Standard.

# Company overview

## Our services

From bespoke design of innovative products to in-house performance testing to levels even above the highest global standards, at Harnessflex we ensure quality at every step.

At Harnessflex, we deliver specialist conduit systems suitable for use in a variety of applications, temperatures and environmental conditions. To achieve this, we work closely alongside OEMs and harness makers to deliver bespoke design systems that are built for purpose. In addition, all the products we manufacture are extensively tested in our in-house testing facility, ensuring they meet the highest levels of performance at all times.

### Conduit systems designed to specification

Following a specification from the OEM, our technical team will draw up detailed final system designs, with 3D printed samples and prototypes for approval. Once signed off, the product will be commissioned for manufacture, with our technical team continuing to deliver engineering and design support throughout the process.

### In-house product testing program

ABB has invested in a new testing facility at the Colehill, UK site for its global cable protection portfolio. Our 1,150sqft facility offers a broad spectrum of testing capacity, from feasibility research to ingress protection, mechanical testing and the accelerated simulation of extreme working environments. The site infrastructure includes hi-end test equipment, most notably, an automated ingress protection water chamber capable of IP X5, X6, X9 testing in accordance with many globally recognised standards.

Our complete product testing capabilities include:

- **Ingress Protection (IP)** - Capable of testing to IPX3, IPX4, IPX5, IPX6, IPX7, IPX8 (to 20 Bar) and IPX9
- **Climatic** - Testing performance in temperatures from -70 to +180 degrees Celsius
- **Mechanical testing** - Including tensile, compression, impact and abrasion at extremes of temperature to establish long term product resilience, resistance and stability. Additionally testing to destruction to assess maximum performance levels.

Through our internal design and testing resources, we are able to deliver high-performance tailored solutions for a variety of challenging operating conditions, to the highest industry standards. By combining our R&D operations, product manufacturing and testing processes into one Harnessflex services package, we can deliver market-leading cable protection solutions to customers around the world, in an accurate and efficient manner.

As standard, we offer a 5 year extended warranty on all Harnessflex products that are installed as part of a complete, fully integrated system.

**5 year warranty on your Harnessflex system**

As all Harnessflex products are intensively tested under the most extreme conditions, we can guarantee the durability of the systems we provide. That's why as standard, we offer a 5 year extended warranty on all Harnessflex products that are installed as part of a complete, fully integrated Harnessflex system.

This gives you and your customers the peace of mind that once your Harnessflex system is installed, it will deliver lasting protection of critical wiring over the vehicle's lifespan.

---

# Harnessflex conduit systems

## Introduction

Harnessflex conduit systems are built for performance, designed to protect critical wiring in harnesses on HGVs, off-road vehicles and other heavy automotives.

—  
01 NC Standard weight  
polyamide 6 conduit.

Harnessflex has the largest range of flexible conduits, sealed fittings, hinged connector interfaces and Y&T pieces, anywhere in the global cable protection market. Constantly evolving through innovation driven by some of the most demanding automotive industry sectors, Harnessflex products are designed to be used together as a system for easy installation and complete wiring harness protection.

Featuring a unique vibration friendly profile (VFP) as standard, as well as UV and heat stabilisation as standard, Harnessflex conduit systems provide 10-150% greater life expectancy in dynamic or vibrating applications, when compared with other products. This maximises the productivity of the system being protected, whilst minimising the risk of electrical failure.

From fit-and-forget CPC conduit systems offering unbeatable dynamic performance, to our TempGuard range that is designed and tested to withstand extreme temperatures, Harnessflex can provide a solution for most applications and environments.

### Features & benefits:

- High flexibility and fatigue life - continuous performance over a long product lifespan
- Protects critical cables with very high abrasion, impact and shock resistance
- Specialist ranges for use in extreme high and low temperatures
- Range includes products with IP40-IP69 rating, as well as self-extinguishing and low fire hazard capabilities and fittings offering reduction options
- VFP as standard, delivering minimal cable abrasion
- Designed to maximise tensile strength and reduce together with all Harnessflex connector interface, Y&T and joining system installations
- 100% inspected and tested

## NC Standard weight, polyamide 6

### General purpose conduit

Solid

Slit

#### Description

Flexible standard weight nylon (PA6) conduit is a general-purpose conduit suitable for automotive harness applications. Able to withstand extremes of temperatures and resistant to automotive oils and solvents. It is extremely tough and has a very high impact strength and high fatigue life.

#### Applications

NC standard weight conduit is extensively used in harnesses on HGV and off road vehicle applications where a superior protection against impact and mechanical shock is preferred. The conduit is used for both chassis and engine applications and can be used in a wide range of temperatures. Polyamide 6 is highly resistant to all hydrocarbon based oils and fluids and many types of solvents.

#### NC Standard weight

Materials: Polyamide 6

Approvals	IP Rating	Appropriate fitting	Temperature range	UV resistance
ADR Approved (Sealed fittings)	<b>IP40</b>	Hinged fittings	Long term: -40°C to +120°C	Very high (Black)

	NC50	NC50-S	50	48	54.5	46.9	70.0	25

Colours available: Black ● RAL 9001 / Orange ● RAL 2003 / Red ● RAL 3031 / \*Other colour options available, subject strictly to MOQ.

To order quote part number & reel length, e.g. NC06/100m. For slit conduit options add -S to part number, e.g. NC06-S/100m.

For colours other than standard Black also add colour, i.e. /OR for Orange conduit, e.g. NC06/OR/100m.

Bulk coil lengths over 200m are also available.

## CTPA Lightweight, polyamide 6

Extra flexible conduit

Solid

Slit

### Description

Extra flexible lightweight nylon (PA6) conduit is a general-purpose conduit suitable for electrical loom applications. Able to withstand extremes of temperatures and resistant to automotive oils and solvents. It is extremely tough and has a medium impact strength and high fatigue life.

### Applications

CTPA lightweight conduit is extensively used in general purpose, lightweight electrical loom applications. Polyamide 6 is highly resistant to all hydrocarbon based oils and fluids and many types of solvents.

### CTPA Lightweight

Materials: Polyamide 6

Approvals	IP Rating	Appropriate fitting	Temperature range	UV resistance
CE Mark to the Low Voltage Directive	IP40	Hinged fitting	Long term: -40°C to +120°C	Very high (Black)

Bulk coil lengths over 200m are also available.

## HTC High temperature, modified co-polyester

### High temperature conduit

Solid

Slit

#### Description

Flexible high temperature, modified co-polyester conduit is a high temperature conduit suitable for automotive harness applications. Able to withstand extremes of temperatures and resistant to automotive oils and solvents. It is extremely tough and has a very high impact strength and fatigue life.

#### Applications

HTC high temperature, modified co-polyester conduit has been developed for use where elevated temperatures occur. Suitable for long term exposure, up to 190°C. HTC is resistant to hydrocarbons, greases, fuels and oils.

#### HTC Medium weight

Materials: Modified Co-Polyester

Approvals	IP Rating	Appropriate fitting	Temperature range	UV resistance
CE Mark to the Low Voltage Directive	<b>IP40</b>	TempGuard & standard hinged fittings	Long term: -50°C to +175°C	Very high
RoHS Compliant to 2011/65/EU	<b>IP67</b>	Sealed fittings	Short term: +190°C	
Conforms with End of Life Vehicle directive (ELV) EU200/53/EC	<b>Degree of mechanical protection</b>		<b>Fire performance</b>	
	Very high flexibility & fatigue life		Self extinguishing	
	Very high elevated temperature, abrasion, impact and shock resistance		Halogen free	

#### Dimensions

Colours available: Brown ● RAL 8016. To order quote part number & reel length, e.g. HTC08/50m. For slit conduit options add -S to part number, e.g. NC08-S/50m.

## CPC Medium weight, FR co-polyester

### Flame retardant conduit

Solid

#### Description

Flexible medium weight, FR co-polyester conduit is a flame retardant, medium weight conduit suitable for automotive harness applications. Able to withstand extremes of temperatures and resistant to automotive oils and solvents. It is extremely tough and has a very high impact strength and fatigue life.

#### Applications

A low smoke, low toxicity conduit, CPC has excellent high and low temperature properties, making it ideal for harness applications such as engine, body section and chassis. CPC is resistant to hydrocarbons, greases, fuels and oils. Contact us for slit conduit options.

#### CPC Medium weight

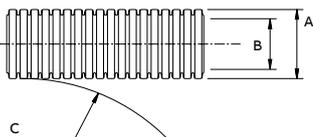

Materials: FR Co-Polyester

Approvals	IP Rating	Appropriate fitting	Temperature range	UV resistance
CE Mark to the Low Voltage Directive	IP40	Hinged fitting	Long term: -50°C to +135°C	Very high

## NCV Standard weight, FR polyamide 6

Flame retardant conduit

Solid

### Description

Flexible standard weight, FR nylon (PA6) conduit is a flame retardant conduit suitable for automotive harness applications. Able to withstand average temperatures and resistant to automotive oils and solvents. It is extremely tough and has a very high impact strength and high fatigue life.

### Applications

NCV is used in applications requiring repeated flexing coupled with flame retardant resistance.

### NCV Standard weight

Materials: FR Polyamide 6

Approvals	IP Rating	Appropriate fitting	Temperature range	UV resistance

## HNC Standard weight, polyamide 12

Low temperature, extra flexible conduit

Solid

### Description

Extra flexible standard weight nylon (PA12) conduit is suitable for low temperature automotive harness applications. It is extremely tough and has a very high impact strength and fatigue life.

### Applications

HNC is particularly used in applications requiring repeated flexing such as dynamic couplings, i.e. hydraulic arms and trailer couplings or rapid continuous motion, demanding high fatigue life and extra flexibility even in low temperature environments. Highly resistant to low temperature impact. HNC Standard weight conduit is designed for connection to all Harnessflex hinged and sealed fittings. Contact us for slit conduit options.

### HNC Standard Weight

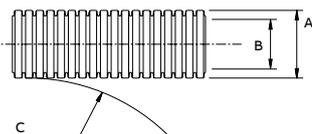

Materials: Polyamide 12

Approvals	IP Rating	Appropriate fitting	Temperature range	UV resistance
CE Mark to the Low Voltage Directive	<b>IP40</b>	Hinged fitting	Long term: -60°C to +105°C	Very high
UL94 HB rated	<b>IP67</b>	Sealed fittings	Short term: +120°C

## PP Medium weight, polypropylene

### Polypropylene conduit

Solid

#### Description

Flexible medium weight, polypropylene conduit is suitable for automotive harness applications. Able to withstand average temperatures and resistant to automotive oils and solvents. It is extremely tough and has a high acid resistance and medium fatigue life.

#### Applications

PP is particularly used in lighter applications where compression strength and LFH is not so important. The main property of this conduit is acid resistance. PP is designed for connection to all Harnessflex Sealed and Hinged system fittings.

#### PP Medium weight

Materials: Polypropylene

Approvals	IP Rating	Appropriate fitting	Temperature range	UV resistance
CE Mark to the Low Voltage Directive	<b>IP40</b>	Hinged fitting	Long term: -20°C to +90°C	High
UL94 HB rated	<b>IP67</b>	Sealed fittings	Short term: +105°C	
RoHS Compliant to 2011/65/EU	<b>Degree of mechanical protection</b>		<b>Fire performance</b>	
Conforms with End of Life Vehicle directive (ELV) EU200/53/EC	High flexibility and acid resistance		Halogen free	
	Medium fatigue life, impact and shock resistance			

#### Dimensions

Colours available: Black ● RAL 9001. To order quote part number & reel length, e.g. PP08/100m. Bulk coil lengths over 200m are also available.

## DSPP Deep section, medium weight, modified polypropylene

Modified Polypropylene conduit

Slit

### Description

Flexible deep section, medium weight, modified polypropylene conduit is suitable for automotive harness applications. Able to withstand average temperatures and resistant to automotive oils and solvents. It is extremely tough and has a high acid resistance and medium fatigue life.

### Applications

DSPP has a deep section to maintain the conduit shape during bending. Deep Section Conduits are supplied in slit form to facilitate rapid cable installation and are designed for connection to all Harnessflex hinged fittings.

### DSPP Deep section medium weight

Materials: Modified Polypropylene

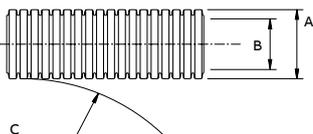

Approvals	IP Rating	Appropriate fitting	Temperature range	UV resistance
CE Mark to the Low Voltage Directive	IP40	Hinged fitting	Long term: -20°C to +90°C	Very high
UL94 V2 rated	<b>Degree of mechanical protection</b>		Short term: +105°C	
RoHS Compliant to 2011/65/EU	High flexibility and acid resistance		<b>Fire performance</b>	
Conforms with End of Life Vehicle directive (ELV) EU200/53/EC	Medium fatigue life, impact and shock resistance		Halogen free

# Conduit fittings and connector interfaces

## Introduction

Harnessflex conduit fittings and connector interfaces are designed to offer effective stable joints and connections in a wiring harness, that also shield against high pressure wash-down, excessive dust ingress, cable strain and mechanical abrasion.

### Capabilities

Harnessflex works closely with many OEMs to develop protection for critical electrical wiring through two-piece or hinged joints and junctions, sealed fittings and bespoke connector interfaces.

Our experienced internal design team uses 3D CAD modelling software to constantly develop innovative new solutions, as well as various bespoke concepts for customer approval.

Through our astute understanding of customer requirements, Harnessflex products are designed and manufactured to integrate seamlessly into harnesses for various heavy automotive applications.

### Features & benefits

- Internal form of fittings protects cables from abrasion
- Internal backstop alleviates any potential problems caused by unevenly cut conduit and ensures correct assembly
- Interfaces can be used in areas where electrical connectors are vulnerable to high pressure washing
- Interfaces offer strain relief to crimped contacts
- When 90° swivel elbows are used with interfaces they allow the harness to self-level
- All Harnessflex Y, T and joiners can be used with CCSB to further enhance the conduit and connection's tensile and bending performance

### TempGuard

Modern engine design has continually evolved to meet changing times. Global regulations such as Euro 6, USA10, and Tier 4 for off-highway heavy duty vehicles have mandated that manufacturers reduce emission levels. This required reduction, along with EGR systems that recycle an engine's waste gases and the use of single or multiple turbos to improve tractability, power and fuel efficiency, have all contributed to higher engine running temperatures.

This has led to the automotive industry actively looking for a complete and effective solution for protecting wiring and connectors in their engines.

Harnessflex TempGuard conduits and fittings are a unique innovation designed to work specifically with high temperature wiring, allowing them to successfully operate at up to 200°C. Created from the outset for use as a full system, the range is made from specialist co-polyester and polyamide respectively, offering reliable protection for vital cable connections. The TempGuard system is manufactured from low smoke/zero halogen materials, and has also endured intensive long-term heat aging, tensile and impact strength testing to help ensure consistent performance.

### Features & benefits

- High temperature range (up to 200°C) consisting of HTC conduit, T and Y-Piece fittings, straight and elbow joiners and common connector interfaces
- Safely protects against heat, abrasion, vibration and automotive fluids in all harness routing areas
- Very high fatigue life
- Made from high temperature Polyamide material
- UL94 V2 rated material
- Intensively tested for high tensile and impact strength

### Key features:

- 1 **Compact design** - Reducing distance between centres
- 2 **High pull-off strength** - Conduit corrugations sit tightly into joiner junctions
- 3 **Integral retaining clips** - Retains conduit in position during assembly

## JPS Joiner

External conduit fitting

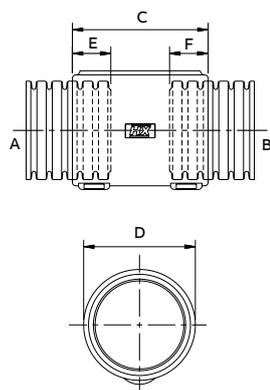

### External joiner

One-piece joiner fittings allow a variety of conduit size variations. These fittings are designed to snap together over all types of slit and unslit conduit, maintaining maximum conduit bore. Can be used as an in-line reducer as well as an enlarger.

### JPS / JPH External joiner

## External conduit fitting

### External T-piece

3 junction fittings allow a variety of conduit size variations. These fittings are designed to snap together over all types of slit and unslit conduit, maintaining maximum conduit bore.

# XPS X-piece

External conduit fitting

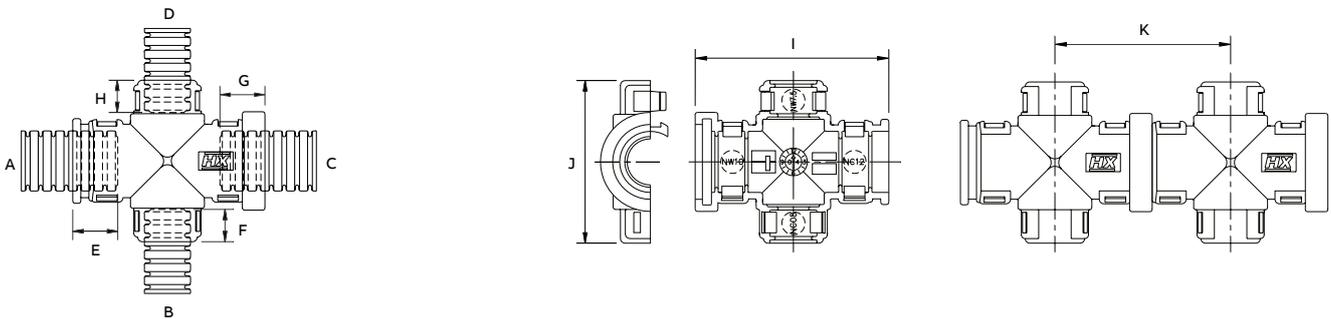

### X configuration fitting

X configuration fitting designed to snap together to create closely packed conduit breakouts, allowing conduit to self level as the fitting rotates.

## CPS Protective shroud

Inline splicing, fuse and connector cover

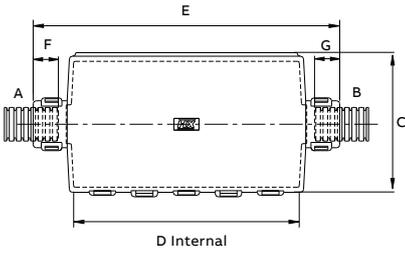

### External protective shroud

Inline cover providing protection for connectors, fuse links, circuit breakers and splicing areas. The CPS shrouds can be used as a harness datum, due to the integrated cable tie/fir tree facility. The strong construction allows for the protection of delicate connections, or as an alternative when an interface / backshell isn't available. These fittings are designed to snap together over all types of Harnessflex slit and unslit conduit, maintaining maximum conduit bore.

# CCSB Conduit clips

## Reducing closure clips for slit conduit

3-in-1 circular clips for slit conduit that offer up to 50% greater resistance to compression and mechanical strain.

CCSB conduit clips are designed to securely close slit conduit, preventing cable exposure. This reduces the risk of cable damage, improves crush strength of slit conduits and offers greater strain relief on all Harnessflex hinged fitting and conduit systems.

CCSB conduit clips are made from resilient PA66 material and provide additional compression strength to slit conduits. When applied, CCSB clips also help to maintain conduit integrity when strained, greatly reducing associated risks of gapping and severe damage to cables.

### Strain relief enhancing

Size	Average plain Y/T	Average Y/T with CCSB
NC12	88	97 (+10%)
NC16	51	72 (+41%)
NC20	62	64 (+3%)
NC25	160	175 (+9%)
NC32	147	193 (+31%)
NC40	72	100 (+38%)

Results: Average performance benefit +22%.

CCSB conduit clips also provide a reducing function for hinged fittings, allowing smaller conduits to be installed securely into larger conduit outlets. Some clips can be clipped together to offer further reducing options, allowing inventory to be maximised and providing greater product installation flexibility for global harness-makers.

### Features & benefits

- **Average strain relief increase by 22%**
  - for all hinged fittings on conduit / interface junction outlet
- **Average tensile strength (pull off) increase by 21%**
  - for all hinged fittings on conduit / interface junction outlet
- **3-in-1 multi-functional capabilities:**
  - Strengthens conduit - up to 50% greater resistance to compression
  - Provides greater strain relief - increases snap out performance of all backshells and hinged fittings
  - Facilitates numerous reducing options - enables size of conduit used within a standard fitting or backshell to be stepped down when needed
- External grooves to allow attachment of single piece fixing clips for ease of installation
- Securely closes slit conduit to prevent cable exposure
- Can be easily stacked to enable further reduction in conduit size
- Suitable for all Harnessflex slit and un-slit conduits

### T-Piece + CCSB

### CCSB reduction options - Single clip outlet assembly

## Fitting accessories

### In-line circular fitting

#### In-line circular fitting

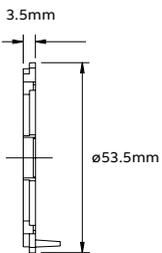

One-piece straight fittings providing in-line 'customised' combinations of multiple conduit breakouts. ST break out disk configuration can be made to order, for more details see website for specification and ordering sheet. NC08 outlets can be blanked off using BPST08.

## Fitting accessories

### Multi-way reducers

#### Multi-way reducers

One-piece, multi-way breakout inserts providing reducing options to a variety of conduit sizes from a single fitting junction. These reducers can accommodate all types of Harnessflex slit and unslit conduit and may be used with all Harnessflex fittings.

#### 1. Split external design

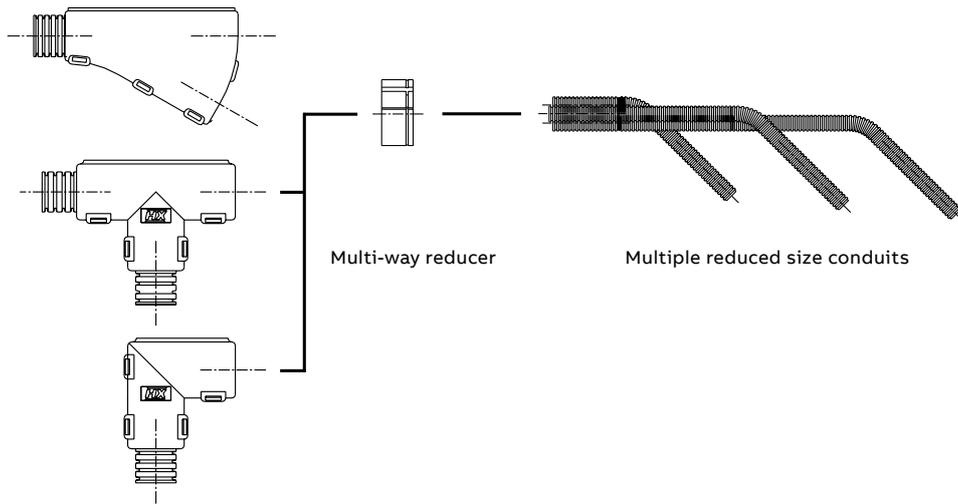

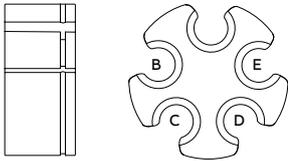

Unrestricted bore and quick assembly - no tools required.

#### 2. Multiple configuration options

Provides the right conduit and outlet position option.

## Fitting accessories

### 06 Reducer

#### 06 Reducer

The 06 Reducer has been designed to seat in the conduit outlet of any 08 (NW 7.5) Harnessflex fitting. This enables the use of 06 (NW 4.5) conduit with fittings and makes possible, a full 06 size conduit cable protection system to include conduit, fittings and connector interfaces.

# Connector interfaces

## Providing high integrity connections

Harnessflex works closely with many OEMs to develop protection for electrical connectors (a critical area of an engine harness).

01 TE Ampseal 16 external connector interface.

External connector interfaces offer a compact and high integrity connection between automotive connectors and Harnessflex conduit systems. These interfaces provide complete cable protection right up to the connector. They also provide strain relief and protection from high pressure washing, helping to maintain the sealing integrity of the connector.

Products include:

- **External hinged connector interfaces** - Tough and durable protection for OEM connectors against high pressure wash-down, excessive cable strain and mechanical abrasion.
- **External split connector interfaces** - Split type customised interfaces providing high integrity connections to the Molex SRC series of connectors and Harnessflex conduit systems.
- **Special customised products** - Special hinged interfaces and blanking products.

Features & benefits include:

### 1. High pull-off strength

Internal conduit backstop provide insertion guide ensuring system integrity and high pull off strength.

### 2. Conduit size labels

Each junction indicates nominal conduit size to aid installation.

### 3. Straight or 90° elbow versions

Compact design ideal for use where space is limited. Allowing 360 degree rotation for ease of routing.

# Sealed fittings

## Introduction

Harnessflex sealed conduit fittings are designed to offer effective stable joints and connections in a wiring harness, that also shield against high pressure wash-down, excessive dust ingress, cable strain and mechanical abrasion.

### Capabilities

Harnessflex offers complete system solutions for the routing and protection of electrical wiring against damage by impact, mechanical abrasion, liquid ingress and corrosive salts. Using a Harnessflex conduit system ensures that vulnerable connectors are not exposed to the elements, impact of foreign bodies or jet washing, all of which can cause vehicle malfunction and failure.

Featuring a unique vibration friendly profile (VFP) as standard, as well as UV and heat stabilisation as standard, Harnessflex solid conduit systems provide 10-150% greater life expectancy in dynamic or vibrating applications, when compared with other products.

### Features & benefits

- The anti-vibration spring clips can be released easily if access is needed - no tool required
- In order to maintain the IP rating of the sealed fittings face sealing washers must be used with all threaded fittings
- Our sealed T & X pieces and sealed manifolds have inspection covers, which can be removed during installation to aid cable routing

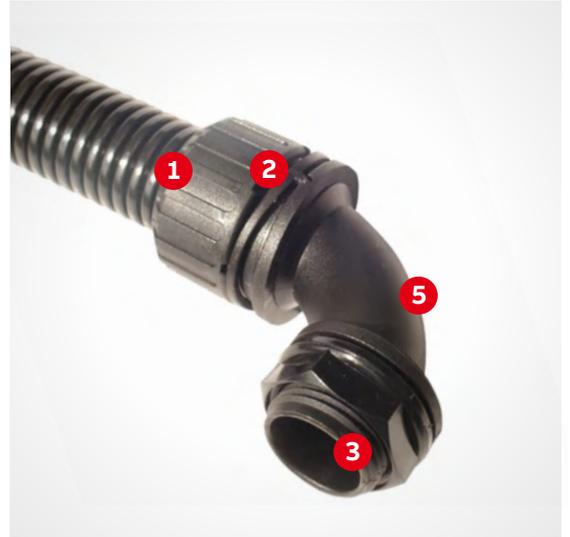

### Key features:

- 1 IP66, IP67, IP68 & IP69 sealing**  
SRN sealing bush protects against ingress of water and dust
- 2 Cap-nut retention ring**  
Ensures integrity of assembly under extreme vibration
- 3 Choice of threads (AB Straight fitting)**  
Available with metric, PG fixed male threads, NPT & PF
- 4 Includes flat seal washer**  
Provides seal between panel/bulkhead and fitting
- 5 90° Swept elbow / 90° Flange**  
Avoids cable damage and abrasion
- 6 Smooth contoured internal form**  
Protects cables from damage during installation
- 7 Integral mounting bracket**  
Provides secure external fixing point
- 8 Removable IP67 inspection lid**  
Provides easy access to cables during installation

### Sealed fittings

Approvals	IP Rating	Appropriate fitting	Temperature range	UV resistance
ADR Approved (NC conduits ONLY)		For use with: All conduits in the Harnessflex range	-40°C to +150°C	Very high
CE Mark to the Low Voltage Directive			<b>Fire performance</b>	
RoHS Compliant to 2011/65/EU	<b>IP66</b>	Yes	Self extinguishing	
Conforms with End of Life Vehicle directive (ELV) EU200/53/EC	<b>IP67</b>	Yes	Low smoke toxicity	
	<b>IP68</b>	Yes (2 bar 30mins)	Halogen free	
	<b>IP69</b>	Yes

## Sealed fittings

### Solenoid connector

#### Solenoid connector

Screw-thread straight and elbow connectable interfaces for circular solenoids, sensors and switches. These fittings are designed for use with all types of unslit Harnessflex conduit, maintaining maximum conduit bore.

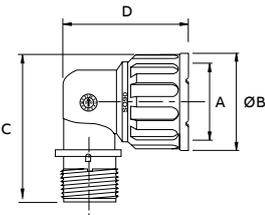

#### Solenoid connector

Solenoid connector Part No.	Conduit Size		Body	Seal	Capnut	Configuration
	NC	NW				
SC-M24-S	08	7.5	SC-M24-90	RSB12-08	CN09-08	B
	10	8.5	SC-M24-90	SRN07	CN07	A
	12	10	SC-M24-90	SRN09	CN09	A
SC-M27-S	08	7.5	SC-M27-90	RSB12-08	CN09-08	B
	10	8.5	SC-M27-90	SRN07	CN07	A
	12	10	SC-M27-90	SRN09	CN09	A

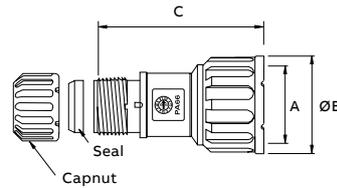

NOTE: Order solenoid bodies, cap nuts and sealing bushes separately.

#### Solenoid connector interfaces

Elbow fitting Part No.	Thread	Nominal dimensions (mm)				Nut colour
		A	B	C	D	
SC-M24-90	M24 x 1.0mm	31.3	8.5	40.5	Black	
SC-M27-90	M27 x 1.0mm	34.0	40.4	0.5	Grey	

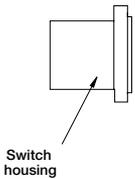

Straight fitting Part No.	Thread	Nominal dimensions (mm)				Nut colour
		A	B	C	D	
SC-M24-S	M24 x 1.0mm	31.0	53.0	-	Black	
SC-M27-S	M27 x 1.0mm	34.0	54.0	-	Grey	

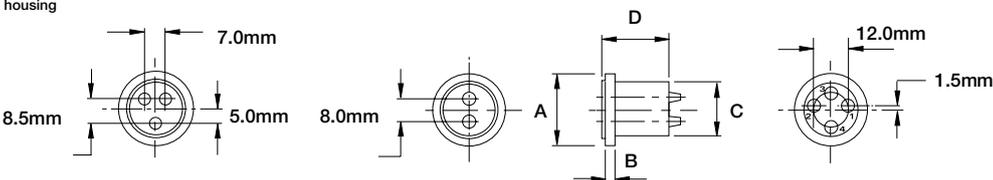

NOTE: Dimensions refer to overall assembly.

#### RSG Housing - Sealed fittings

Part No.	Suitable for connector type	Number of pins	Nominal dimensions (mm)			
			A	B	C	D
RSG02	M27	2	25.0	3.5	18.7	23
RSG03	M27	3	25.3	3.5	18.0	21
RSG04	M27	4	25.3	3.5	18.7	23
RSG05	M24	2	22.5	3.5	18.0	23
RSG06	M24	3	22.3	3.5	18.0	21

Switch housing

## Sealed fitting accessories

### Locknuts & Face sealing washers

**1. Protects cables from damage during installation**

With twin location points to assist fixing to conduit or connector.

**2. Internal location lip**

Provides internal protection during cable installation.

**3. Multiple cable carrying capacity**

Provides cable breakout facility in situations where sealing is not required.

#### Locknut

Part No.	Thread size	A (mm)	B (A/F) (mm)	Part No.	Colour	Thread size	A (mm)	B (A/F) (mm)

ESN40	40	36	16 - 30	56	35	50

## Sealed fitting accessories

### Locknuts & Face sealing washers

**1. Swivel capability**

Converts sealed fittings into freely rotating IP40 fittings for dynamic applications.

**2. High pull-off strength**

Split C ring design sits tightly into conduit corrugations.

End cap

	Part No.	From conduit size		Outlet dia. range (mm)	Nominal dimensions (mm)		
		NC	NW		A	B	C
	EK03-08	08	7.5	3	19	13	14

	CES28	28	23	20.5	20	32
	CES32	32	29	25.7	20	38

NOTE: Push in one piece fitting leaving a smooth exit from conduit when fittings not used.

## General accessories

### Conduit clip & Metallic P-clip

Conduit clip

#### Conduit clip

One piece non-metallic conduit clips providing secure mounting points for Harnessflex conduit systems. These fittings are designed to snap together over all types of Harnessflex slit and unslit conduit.

	Part No.	Conduit size A (mm)		Nominal dimensions (mm)					
		NC	NW	A	B	C	D	E	F
	HCB08	08	7.5	19.8	11.9	21.2	11.4	5.7	5.1
	HCB12	12	10	21.6	11.9	22.9	12.2	7.4	5.1

	HCB50	50	48	71.9	17.2	73.4	37.5	8.7	6.2

Metallic P-clip

#### Metallic P-clip

One-piece, metallic P-clips providing secure mounting points for conduit systems within a harness installation. These clips are designed to accommodate all Harnessflex slit and unslit conduits.

	Part No.	Conduit size (mm)		Fixing hole size (mm)				
		NC	NW	A	B	C	D	E
	PCS10	10	8.5	31	13	5	16	1.5
	PCS12	12	10	33	13	5	17	1.5
	PCS16	16	13	36	13	5	19	1.5
	PCS20	20	17	41	13	5	21	1.5
	PCS25	25	22	45	13	5	23	1.5
	PCS32	32	29	53	13	5	27	1.5

Materials: Galvanised steel with rubberised insert.

## General accessories

### Cable glands

#### Cable glands - Sealed fittings

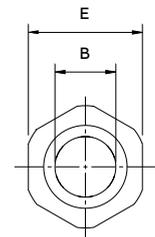

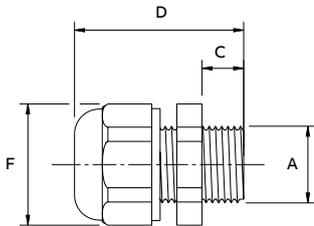

Straight compression type cable glands incorporating fixed male threads to provide secure cable connections through knockouts and threaded entries.

#### Cable glands - Sealed fittings

Metric Part No.	Metric thread A	Cable OD range B (mm)	Nominal dimensions (mm)			
			C	D	E	F
CGS-M16	M16 x 1.5mm	4.0 - 10.0	9	34.5	21	23.5
CGS-M20	M20 x 1.5mm	6.0 - 12.0	10	37.0	24	27.0

## Technical section

### Storage recommendation for polyamide products

**Polyamide is widely and successfully used for products in the electrical and electronics industries. Thanks to its excellent mechanical and physical properties over a wide range of application temperatures and its very good weather resistance, polyamide can be used to make products for interior and external use that meet the most stringent of demands.**

As a hygroscopic material, polyamide has the ability to absorb moisture in molecular form into the plastic matrix. As the moisture content goes up, product properties may change slightly. Absorbed water acts as a plasticiser reducing strengths and moduli and increasing the toughness of the polyamide.

Although at room temperature the stiffness and strength of PA6 is more reduced by the moisture uptake than those of PA66, this difference can be considered to be non-significant. PA6 absorbs more water than PA66, especially under high humidity conditions. But the resulting dimensional change is still of a similar order.

Figure 1 shows how the moisture content of polyamides comes into balance with the ambient air in a normal climate of 50% relative humidity and 23°C:

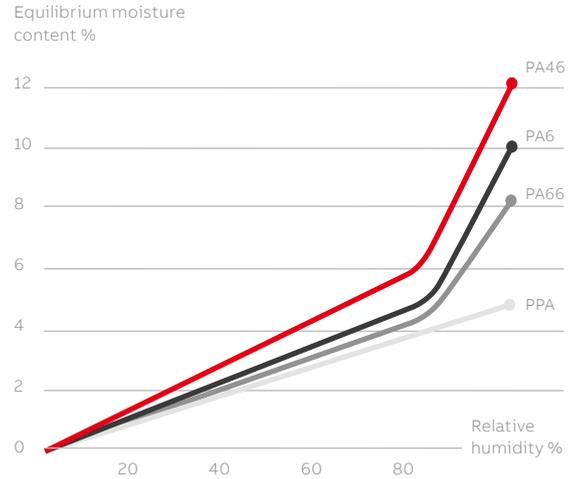

Material	In air (23°C / 50% rh)
Polyamide 6	3.0-3.5% by weight
Polyamide 66	2.5-3.0% by weight

To maintain balanced moisture content, Harnessflex recommends storing products under the following conditions:

Storage temp	Processing temp.	Rel. humidity
18°C to 30°C	>18°C	>30%

At lower processing temperatures and in particular when subjected to unnatural drying, corrugated pipes display increased flexural rigidity.

**Figure 1: Moisture content of polyamides**

In the very dry winter months the moisture balance may go down slightly as the material releases moisture to the environment (owing to lower relative humidity). Compared to natural outdoor conditions\* at around 0°C (40... 80% rh), the humidity in heated rooms may drop by half to below 20% rh if no humidification is present. (Even extremely dry regions such as the Sahara Desert record average humidity of 20% to 60% rh) (\*Central European climate).

If products from an outside environment are brought into a heated processing area, the change in climate may suddenly cause temporary de-moisturisation around the edges. After one or two days in the processing area a natural balance will be restored.

Observing this storage recommendation ensures optimum processability and material properties.

## Ingress protection

### IEC 60529 IP Rating & NEMA 250 / UL50E Enclosures

IP suitability ratings are a system for classifying the degree of protection provided by enclosures of electrical equipment.

#### Protection against Solid Bodies

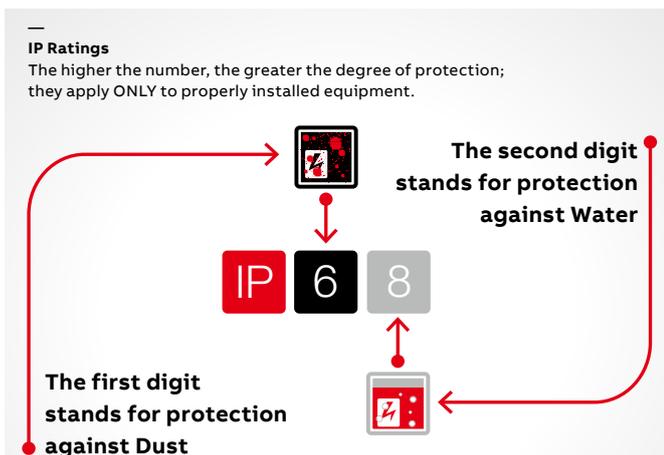

Degree of protection for persons against access to hazardous parts inside the enclosure and/or against the ingress of solid foreign objects.

	<b>0</b>	No protection
	<b>1</b>	Objects greater than 50 mm, accidental touch by hands
	<b>2</b>	Objects greater than 12 mm, accidental touch by fingers
	<b>3</b>	Objects greater than 2.5 mm, e.g. tools/wires
	<b>4</b>	Objects greater than 1 mm, e.g. tools/wires/small wires
	<b>5</b>	Protected against dust - limited ingress (no harmful deposits)
	<b>6</b>	Totally protected against dust (Dust-tight)

#### Protection against Water

Degree of protection of equipment inside enclosures against damage from the ingress of water.

	<b>0</b>	No protection
	<b>1</b>	Protected against vertically falling drops of water
	<b>2</b>	Protected against direct sprays of water 15° from vertical
	<b>3</b>	Protected against sprays of water to 60° from vertical
	<b>4</b>	Protected against water sprayed from all directions - limited ingress permitted
	<b>5</b>	Protected against low pressure jets of water from all directions - limited ingress permitted
	<b>6</b>	Protected against strong pressure jets of water, heavy seas - limited ingress permitted
	<b>7</b>	Protection against the effects of immersion between 15cm - 1 m
	<b>8</b>	Protection against long periods of immersion under a quoted pressure, e.g. 2 bar at 24 hours
	<b>9</b>	IP69 Automotive standard DIN40050 and signifies resistance to high pressure jets of water (up to 80bar) from any angle

<b>Electrical</b>			
Dielectric strength	IEC 60243-1	18.7	kV/mm
Volume Resistivity	IEC 60093	>1E <sup>13</sup>	Ω*m
Comparative Tracking Index	IEC 60112	600	V
Relative permittivity (100Hz)	IEC60250	4.2	-
Relative permittivity (1MHz)	IEC60250	3.7	-
Dissipation factor (100Hz)	IEC60250	157	E-4
Dissipation factor (1MHz)	IEC60250	385	E-4

**NOTE:**

All tests undertaken at 23°C where applicable

\*Information Source - Polymer supplier published information.

#### Chemical resistance

Co-Polyester Harnessflex conduits are resistant to under bonnet oils, greases, fuels, cleaning fluids and acids. They are not resistant to transformer oils or brake fluids (DOT 3/4)

#### Product Temperature Range @1.5mm material thickness:

Minimum Static 30,000 hours -50°C

Minimum dynamic 5000 operations -45°C

Maximum static long term 30,000 hours +175°C

Maximum short term 3,000 hours +190°C

## Technical section

### Polyamide 12 (Nylon)

**Polyamide 12 (Nylon) – Plasticized, impact modified, heat and UV stabilised. Used on: All Harnessflex unreinforced nylon fittings.**

Properties	Test method	Value	Unit
<b>General</b>			
Density	ISO 1183	1.030	kg/m <sup>3</sup>
Melting Point	ISO 11357	173	°C
<b>Mechanical</b>			
<b>Dry/cond</b>			
Yield Stress	ISO 527-1/-2	25	MPa
Yield Strain	ISO 527-1/-2	20	%
Charpy impact strength (+23°C)	ISO 527-1/-2	400	MPa
Charpy impact strength (-30°C)	ISO 179/1eU	DNB	kJ/m <sup>2</sup>
Charpy notched impact strength (+23°C)	ISO 179/1eU	DNB	kJ/m <sup>2</sup>
Charpy notched impact strength (-30°C)	ISO 179/1eA	DNB	kJ/m <sup>2</sup>
<b>Thermal</b>			
Temp of deflection under load (1.80 Mpa)	ISO 75-1/-2	45	°C
Temp of deflection under load (0.45 Mpa)	ISO 75-1/-2	95	°C
<b>Flammability</b>			
Flammability (@0.8mm)	IEC60695-11-10	HB	N/A
<b>Electrical</b>			
Dielectric strength	IEC 60243-1	32	kV/mm
Surface Resistivity	IEC 60093	1E11	Ω
Volume Resistivity	IEC 60093	1E11	Ω*m
Comparative Tracking Index	IEC 60112	600	V

**NOTE:**

DNB = Did not break

dry = Dry as moulded

cond = Conditioned 168hrs @ 23°C, 50 % RH

All tests undertaken at 23°C where applicable

\*Information Source - Polymer supplier published information.

The data given is typical data and does not represent minimum values. Variations within normal tolerances are possible for different colours

#### Chemical resistance

PA12 Harnessflex conduits are resistant to all under bonnet oils, greases, fuels, cleaning fluids and synthetic fluids. Like all Nylons they are resistant to weak /medium acids but not resistant to strong or oxidizing acids.

#### Product Temperature Range @1.5mm material thickness:

Minimum Static 30,000 hours -50°C

Minimum dynamic 5000 operations -45°C

Maximum static long term 30,000 hours +105°C

Maximum short term 3,000 hours +120°C

#### Thermoplastic Elastometer TPV - Material data sheet

Properties	Test method	Value	Unit
<b>General</b>			
Density	ISO 1183	0.96	g/cm <sup>3</sup>
Hardness shore A (5 sec)	ISO 868	56	–
Brittleness temperature	ISO 812	-62	°C
Flammability	UL94	HB	–
Stress/strain properties	ISO 37 (II)	–	–
<b>Flow Direction</b>			
Tensile strength	–	3.8	MPa
Modulus 100%	–	2.7	MPa
Elongation at break cross direction	–	280	%
Tensile strength	–	5.1	MPa
Modulus 100%	–	1.9	MPa
Elongation at break	–	470	%
<b>Tear Strength (cross direction)</b>			
Trouser	ISO 34 A	7	kN/m
Un-nicked angle	ISO 34 B (a)	22	kN/m
Compression set	ISO 815	–	–
72h/23°C	–	22	%
72h/70°C	–	26	%
72h/100°C	–	34	%
<b>Hot Air Ageing</b>			
1000h/125°C - Change in hardness	–	2	pts
Retention tensile strength	–	90	%
Retention - elongation at break	–	96	%
336h/150°C - Change in hardness	–	0	pts
Retention tensile strength	–	90	%
Retention elongation at break	–	87	%
<b>Volume Swell</b>			
72h/100°C water	–	+3	%
168h/100°C ASTM oil 1	–	+43	%
168h/100°C ref fuel B	–	+91	%

Used on: Sealing products.

A polypropylene based elastomer designed primarily for demanding automotive applications.

This material exhibits excellent compression set, flex fatigue and high and low temperature performance.

NOTE: Tests are conducted on injection moulded plaques. All tests undertaken at 23°C where applicable.

#### Chemical resistance

TPV fittings are resistant to: Water, acids, ethanol, glycerol, methanol and propanol, hydraulic brake fluid and antifreeze. Large volume swell (>60%) is experienced with certain oils and fuels.

#### Approvals

Individual parts are approved to different standards including NFR 13-903. Others are manufacturer specific or are new developments and may not be approved to certain standards. Please contact the technical office for specific enquiries.
